## New Nanoparticles and Dispersions Brochure

Alfa Aesar, a Johnson Matthey Company, announces the publication of a new brochure featuring nanoparticles and nanodispersions from Nanophase Technologies, Inc.

隶属于Johnson Matthey公司的 Alfa Aesar发布了关于纳米粒子和纳米粒子在纳米相分散技术的新手册

Alfa Aesar is the sole global distributor of research and development quantities for a group of raw nanoparticles and dispersions manufactured by Nanophase. Nanocrystalline powders typically have a mean particle size less than 100 nm, are non-porous single crystals, have defined surface chemistry, and are chemically pure. The dispersions in water or other liquids offer a more refined product allowing uniform distribution of material.

Alfa Aesar是全球唯一的致力于研究和发展由纳米相制备多种纳米粒子原材料和分散体系的销售商。纳米晶体粉末平均粒径通常小于100纳米，无孔单晶结构，被限制的表面化学，化学纯级。当分散于水中或其它液体中时，以独特的材料分布状态成为更精细的化学品。

The potential applications for these materials are virtually endless and the new brochure from Alfa Aesar promotes the availability of sample sizes to a broad research and development audience. The materials are in stock at Alfa Aesar and available for immediate shipment.

实际上，这些材料的应用潜力是无限的，Alfa Aesar的新手册提供了更多的样品尺寸可供研究者选择。这些材料均在Alfa Aesar有库存，可以随时发货。
