Alkali Borate Fusion Fluxes

碱金属硼酸熔融焊剂

Alfa Aesar, a Johnson Matthey Company, has announced the publication of a new technical document, which provides a complete guide to the use and selection of Spectroflux alkali metal borate fusion fluxes. Recognized worldwide for quality and consistency, Spectroflux fluxes are used in the preparation of samples for analysis of a wide variety of inorganic materials.

隶属于Johnson Matthey公司的Alfa Aesar发布了全新的技术手册，提供选购Spectroflux碱金属硼酸熔融焊剂的全面向导。以全世界公认的品质和强度，Spectroflux焊剂应用于准备各类无机材料样品用以分析测试。

The new 10-page document covers a series of topics, including typical materials analyzed, sample preparation, analytical techniques, application notes, instrumentation overview, and flux selection guidelines. Dozens of Spectroflux products are listed in three categories: the "Classic", the specialized, and the new pre-fused fluxes. The pre-fused fluxes have been developed and extensively tested to offer many additional benefits in handling, dispensing and application. Spectroflux products are available from stock from Alfa Aesar sales and distribution points throughout the world.

全新的10页手册包括多个主题，其中有常用材料分析，样品制备，分析工艺，应用注意事项，仪器使用概述以及焊剂选用向导。所有Spectroflux产品被分为三类：“经典”，专用，以及新预融焊剂。预融焊剂出厂时经过一系列严格测试，在使用，分配和应用过程中拥有更多优势。现在Spectroflux产品在Alfa Aesar的全世界各地的销售点均有库存。

A final section summarizes ideal selection of platinum crucibles, lids, moulds, tongs and casting dishes for manual as well as automatic fusion techniques. Alfa Aesar offers reliable Johnson Matthey Zirconia Grain Stabilized (ZGS) 95% platinum, 5% gold labware as well as a variety of other materials and forms.

最后一节总结了如何选择铂制坩锅，盖子，模具，钳，铸造皿的用于手动或自动熔融技术。Alfa Aesar提供可靠的Johnson Matthey添加二氧化锆晶粒稳定剂的含95%铂，5%金的实验器具以及其他材料和形状的实验器具。
