

Structure and MDL® Number Searching Now Offered on Alfa Aesar Web Site Alfa Aesar网站现在提供结构与MDL号检索

Alfa Aesar, a Johnson Matthey Company, has added a molecular structure and substructure search capability, as well as a search by MDL® number option, to its website at www.alfa.com.

隶属于Johnson Matthey公司的 Alfa Aesar增强了分子结构及其子结构的检索能力，同时在 www.alfa.com 上提供了MDL检索选项

The new structure search function allows Alfa Aesar customers to search for families of building blocks and intermediates through the use of a molecular drawing tool. The user can draw a molecule and search either by substructure, where any instance of the drawn molecule as a complete structure or as a substructure is returned as a search result, or by exact structure where only exact matches are returned. The drawing tool provided is the well-known JME Editor developed by Peter Ertl of Novartis.

新结构检索功能允许Alfa Aesar的客户通过分子作图工具来检索结构单元家族和中间体。用户可以作一个完整分子图，或仅画出其中一部分，任何拥有这部分结构的分子检索结果都会被给出，当选择精确检索时，仅有完全与之匹配的分子结构的检索结果才会被给出。分子绘图工具是由著名的JME Editor提供。
